Senior Full Stack Engineer with around 10 years of commercial experience in TypeScript, Node.js (NestJS, Express) and React/Angular on AWS and Azure. At First Advantage I build vendor connectors and internal tooling for a background-screening platform that has processed over 1M orders. Previously led a team of 4 developers building a law firm's internal platform for 150 employees and 10,000+ cases, and built products from zero as a sole developer and as a startup CTO. Currently expanding into LLM application development.

Core Competencies

- **Backend & APIs**: Node.js, NestJS, Express.js, TypeScript, REST, GraphQL, webhooks, third-party API integrations, OpenAPI/Swagger, TypeORM, microservices, Python/Django.
- **Frontend**: React.js, Angular, Next.js, Vue.js, JavaScript, HTML/CSS.
- **Cloud & DevOps**: AWS (ECS, Lambda, RDS, SQS, SES, S3), Microsoft Azure (Azure Functions), Docker, CI/CD pipelines.
- **Data**: PostgreSQL, MySQL, MongoDB, Redis.
- **Integration platforms**: vendor connectors, routing, health checks and monitoring, mock services; SaaS integrations (QuickBooks Online, Zoho CRM, Shopify, Mailchimp, PayPal, Authorize.Net).
- **AI & LLM (learning)**: LLM APIs, RAG, AI agents, vector databases; AI-assisted development with GitHub Copilot.

Professional Experience

First Advantage (Nasdaq: FA) — **Kraków, Poland**
Full Stack Engineer — *Feb 2023 - Present*

- Contributed to the architecture design of a vendor-aggregation platform that routes background-screening orders to third-party data providers (KYC/identity, UK Right to Work, I-9/E-Verify, DBS, criminal, employment and education verification, drug & health, resident screening); the platform has processed **1M+ orders**, tens of thousands per month.
- Defined the shared **vendor-connector interface**: communication with the core service, result processing, webhooks, authentication and mobile handoff.
- Own end-to-end vendor integrations: requirements, API analysis, connector development in NestJS, TypeScript and Azure Functions, and dedicated Angular UIs where needed; the team has integrated about 10 vendors.
- Built a **monitoring service** that health-checks every vendor connector, automatically removes failing connectors from routing and alerts the team.
- Built an internal **support tool** (order history, statuses and errors in one place) and a **mock service** emulating vendor APIs for automated and manual testing.
- Work in a Scrum team of 6-7 developers, PO, Scrum Master and 2 QA with global stakeholders on a microservice-based platform; do code reviews and contribute to CI/CD pipelines.

Self-employed, vchebotarev.dev — **Kraków, Poland**
Full Stack Developer (Freelance) — *Mar 2017 - Present*

- Build web applications and integrate businesses with SaaS platforms (CRM, accounting, e-commerce) for clients in Poland and the US.
- **Milcasa Store** (US door-hardware retailer, 2019-2021): developed the Shopify store (about 150 products and 300 orders/month) and integrated it with Zoho CRM, QuickBooks Online and Mailchimp.

- **Kancelaria Prosperitas** — **Kraków, Poland**
  Full Stack Developer / Team Lead — *Sep 2019 - Jan 2023*
  - From 2020, led a team of **4 developers**: hiring, code reviews, sprint planning and architecture decisions.
  - Built the firm's internal platform used by **up to 150 employees** across **10,000+ legal cases**: CRM with lead intake, client portal, case management, court calendar, accounting and invoicing.
  - Automated claim preparation with template-based document generation and a claim-amount calculator, **cutting it from several days to about an hour**.
  - Automated client status updates (email/SMS via AWS SES), management dashboards, role-based access and GDPR audit logging; ran it on AWS (ECS, Lambda, RDS, SQS, S3) with Docker.
- **Milanodoors** — **Remote, client in New Jersey, US**
  Full Stack Developer (Contract) — *Aug 2018 - Sep 2019*
  - As the sole developer, built a custom CRM/ERP used by **about 30 employees**: sales pipeline, dealer pricing, product configurator with PDF quotes, orders, inventory and shipping.
  - Integrated QuickBooks Online, Zoho CRM, Mailchimp, PayPal and Authorize.Net; quotes now take minutes instead of hours, with no manual double entry into accounting.
- **Spokoloko** — **Kraków, Poland**
  CTO & Co-Founder — *May 2017 - Aug 2018*
  - As lead engineer, with an intern and part-time help from a co-founder, took an event-space booking platform from zero to production on AWS (Node.js, React, MySQL); reached about 200 listed venues and, with the CMO, top Google rankings.
  - Drove product decisions, took part in investor pitches and secured seed investment; exited by selling my equity stake to the investors.
- **SEMA-PRINT** — **Kraków, Poland**
  Full Stack Developer — *Oct 2016 - Jan 2018*
  - Developed and administered the online store (PrestaShop), CRM and inventory systems (PHP, Laravel, MySQL).
- **Ericsson** — **Kraków, Poland**
  Junior C++ Developer — *Jun 2016 - Oct 2016*
  - Developed test scenarios for telecommunications systems in C/C++ (Google Test).

Education

- **Cracow University of Technology (Politechnika Krakowska)** — **Kraków, Poland**
  Bachelor of Engineering in Computer Science — *2014-2018*

Languages

- Russian (native), Polish (fluent), English (B2, daily working language).
